Objective:

I am interested in working in software development fields and improving my skills as a programmer. My passion for programming and knowledge of algorithms will help create efficient and effective programs.

Skills:

- Fluent in C, C++, SQL, Python, HTML, CSS, C#, Java, JavaScript, Matlab
- Proficient in Microsoft Suite, Github, Linux/Unix Systems, Windows OS
- Proficient in speaking and reading Spanish.
- Strong emphasis in database management systems.
- Experience in creating games using Unity Game Engine

Projects:

Personal Website:

- Built and maintain my own personal website that was programmed from scratch without the use of any frameworks or templates.

Game:

- Used Unity Game Engine to make a 2D single screen survival game.
Programmed in C#.

Webpage:

- Worked in a team to design a webpage for my senior design project. Used Google Maps API and programmed in HTML/CSS and JavaScript. Also used a Database to query data to be used by Google fusion tables for the webpage.
Webpage programmed in HTML and CSS and used python for backend scripts.

Discord Bot:

- Created a bot with various useful tools for the all-in-one voice and text chat application Discord. Programmed in Python and used multiple APIs.

Job History:

IQA METAL INC

Chino, California

Computer Technician

Jan 2018- June 2018

- Troubleshoot different types of laptops and computers and determine what hardware or software changes are needed.
- Break down systems, remove malfunctioning hardware and install new parts.

Education:

Bachelors of Science, Computer Science

University of California, Riverside

Major GPA: 3.24, (December 2017)
